To Whom It May Concern:

I am writing to express my support for Dr. Marvin H. Jeter, III. I believe that he has the training experience, and commitment to education to provide leadership to any organization with the goal of improving the quality of educational services for all children.

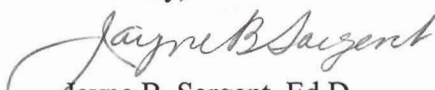

I have known Dr. Jeter and am familiar with the work that he has done over his educational career. He is certainly a professional who is dedicated to improving the quality of academic instruction to all students. With his background in the discipline of education, he is familiar with the process of education which will allow him to transcend the differences that are at times evident with those who have a more narrow perspective of academics.

Dr. Jeter possesses both a learned knowledge and an innate understanding of effective twenty-first century P-20 educational programming. The strategies that he employs align student interests and abilities to real-world learning that demonstrates curricular standards through individual mastery. Dr. Jeter also understands the importance and the functionality necessary to engage the community and local/state agency levels in collaboration to support such schooling.

I have witnessed Dr. Jeter demonstrate a high expectation for performance and a high work ethic. In any capacity, I believe that he will work tirelessly to offer the leadership necessary to take the program for which he is responsible to the next level of education for its students. I have no doubt that he possesses the skills necessary to provide an organization with the caliber of leadership needed for ultimate success.

Please contact me if I may be of further assistance in your decision.

Sincerely,

Jayne B. Sargent, Ed.D.
Interim Superintendent
